In Memory of
Alvin Numa Cahall, Jr.

A wonderful friend who used mathematics in his own way—through
a thorough knowledge of electronics and sound technology.
He is sorely missed by family and friends.

Preface xi
Applications Index xix

1

The Whole Numbers 1

- 1.1 Study Skill Tips for Success in Mathematics 2
- 1.2 Place Value, Names for Numbers, and Reading Tables 8
- 1.3 Adding Whole Numbers and Perimeter 17
- 1.4 Subtracting Whole Numbers 28
- 1.5 Rounding and Estimating 39
- 1.6 Multiplying Whole Numbers and Area 48
- 1.7 Dividing Whole Numbers 61
 - Integrated Review—Operations on Whole Numbers* 75
- 1.8 An Introduction to Problem Solving 77
- 1.9 Exponents, Square Roots, and Order of Operations 87
 - Group Activity* 96
 - Vocabulary Check* 97
 - Chapter Highlights* 97
 - Chapter Review* 101
 - Chapter Test* 108

2

Multiplying and Dividing Fractions 110

- 2.1 Introduction to Fractions and Mixed Numbers 111
- 2.2 Factors and Prime Factorization 123
- 2.3 Simplest Form of a Fraction 130
 - Integrated Review—Summary on Fractions, Mixed Numbers, and Factors* 140
- 2.4 Multiplying Fractions and Mixed Numbers 142
- 2.5 Dividing Fractions and Mixed Numbers 153
 - Group Activity* 161
 - Vocabulary Check* 162
 - Chapter Highlights* 162
 - Chapter Review* 165
 - Chapter Test* 168
 - Cumulative Review* 170

3

Adding and Subtracting Fractions 173

- 3.1 Adding and Subtracting Like Fractions 174
- 3.2 Least Common Multiple 183
- 3.3 Adding and Subtracting Unlike Fractions 190
 - Integrated Review—Operations on Fractions and Mixed Numbers* 201
- 3.4 Adding and Subtracting Mixed Numbers 203
- 3.5 Order, Exponents, and the Order of Operations 214
- 3.6 Fractions and Problem Solving 221
 - Group Activity* 231
 - Vocabulary Check* 232
 - Chapter Highlights* 232
 - Chapter Review* 235
 - Chapter Test* 240
 - Cumulative Review* 242

4**Decimals 245**

- 4.1 Introduction to Decimals 246
- 4.2 Order and Rounding 253
- 4.3 Adding and Subtracting Decimals 262
- 4.4 Multiplying Decimals and Circumference of a Circle 273
- Integrated Review—Operations on Decimals 283
- 4.5 Dividing Decimals and Order of Operations 285
- 4.6 Fractions and Decimals 296
 - Group Activity 304
 - Vocabulary Check 305
 - Chapter Highlights 305
 - Chapter Review 307
 - Chapter Test 312
 - Cumulative Review 314

5**Ratio and Proportion 317**

- 5.1 Ratios 318
- 5.2 Rates 325
- Integrated Review—Ratio and Rate 332
- 5.3 Proportions 334
- 5.4 Proportions and Problem Solving 342
 - Group Activity 352
 - Vocabulary Check 353
 - Chapter Highlights 353
 - Chapter Review 355
 - Chapter Test 359
 - Cumulative Review 361

6**Percent 364**

- 6.1 Introduction to Percent 365
- 6.2 Percents and Fractions 372
- 6.3 Solving Percent Problems Using Equations 379
- 6.4 Solving Percent Problems Using Proportions 387
- Integrated Review—Percent and Percent Problems 395
- 6.5 Applications of Percent 397
- 6.6 Percent and Problem Solving: Sales Tax, Commission, and Discount 408
- 6.7 Percent and Problem Solving: Interest 415
 - Group Activity 422
 - Vocabulary Check 422
 - Chapter Highlights 423
 - Chapter Review 426
 - Chapter Test 430
 - Cumulative Review 432

7

Measurement 434

- 7.1 Length: U.S. and Metric Systems of Measurement 435
- 7.2 Weight and Mass: U.S. and Metric Systems of Measurement 448
- 7.3 Capacity: U.S. and Metric Systems of Measurement 458
- Integrated Review—Length, Weight, and Capacity* 467
- 7.4 Conversions Between the U.S. and Metric Systems 469
- 7.5 Temperature: U.S. and Metric Systems of Measurement 474
- 7.6 Energy: U.S. and Metric Systems of Measurement 479
- Group Activity* 484
- Vocabulary Check* 485
- Chapter Highlights* 485
- Chapter Review* 488
- Chapter Test* 493
- Cumulative Review* 495

8

Geometry 497

- 8.1 Lines and Angles 498
- 8.2 Plane Figures and Solids 508
- 8.3 Perimeter 517
- 8.4 Area 527
- 8.5 Volume 537
- Integrated Review—Geometry Concepts* 545
- 8.6 Square Roots and the Pythagorean Theorem 546
- 8.7 Congruent and Similar Triangles 553
- Group Activity* 562
- Vocabulary Check* 563
- Chapter Highlights* 563
- Chapter Review* 567
- Chapter Test* 574
- Cumulative Review* 576

9

Statistics and Probability 578

- 9.1 Reading Pictographs, Bar Graphs, Histograms, and Line Graphs 579
- 9.2 Reading Circle Graphs 593
- Integrated Review—Reading Graphs* 601
- 9.3 Mean, Median, and Mode 603
- 9.4 Counting and Introduction to Probability 608
- Group Activity* 615
- Vocabulary Check* 615
- Chapter Highlights* 616
- Chapter Review* 618
- Chapter Test* 623
- Cumulative Review* 627

10

Signed Numbers 630

- 10.1 Signed Numbers 631
- 10.2 Adding Signed Numbers 640
- 10.3 Subtracting Signed Numbers 649
 - Integrated Review—Signed Numbers 656*
- 10.4 Multiplying and Dividing Signed Numbers 658
- 10.5 Order of Operations 666
 - Group Activity 672*
 - Vocabulary Check 673*
 - Chapter Highlights 673*
 - Chapter Review 675*
 - Chapter Test 678*
 - Cumulative Review 680*

11

Introduction to Algebra 683

- 11.1 Introduction to Variables 684
- 11.2 Solving Equations: The Addition Property 696
- 11.3 Solving Equations: The Multiplication Property 702
 - Integrated Review—Expressions and Equations 710*
- 11.4 Solving Equations Using Addition and Multiplication Properties 712
- 11.5 Equations and Problem Solving 721
 - Group Activity 731*
 - Vocabulary Check 732*
 - Chapter Highlights 732*
 - Chapter Review 735*
 - Chapter Test 740*
 - Cumulative Review 742*

Appendices**Appendix A** Tables 745

- A.1 Addition Table and One Hundred Addition Facts 745
- A.2 Multiplication Table and One Hundred Multiplication Facts 747
- A.3 Table of Geometric Figures 749
- A.4 Table of Percents, Decimals, and Fraction Equivalents 751
- A.5 Table on Finding Common Percents of a Number 752
- A.6 Table of Squares and Square Roots 753
- A.7 Compound Interest Table 754

Appendix B Unit Analysis 755

- Bigger Picture—Study Guide Outline 772
- Practice Final Exam 774

- Answers to Selected Exercises A1
- Solutions to Selected Exercises A27

- Index I1
- Photo Credits P1

Preface

Basic College Mathematics, Fifth Edition was written to provide a solid foundation in the basics of college mathematics, including the topics of whole numbers, fractions, decimals, ratio and proportion, percent, and measurement as well as introductions to geometry, statistics and probability, and algebra topics. Specific care was taken to make sure students have the most up-to-date relevant text preparation for their next mathematics course or for nonmathematical courses that require an understanding of basic mathematical concepts. I have tried to achieve this by writing a user-friendly text that is keyed to objectives and contains many worked-out examples. As suggested by AMATYC and the NCTM Standards (plus Addenda), real-life and real-data applications, data interpretation, conceptual understanding, problem solving, writing, cooperative learning, appropriate use of technology, mental mathematics, number sense, estimation, critical thinking, and geometric concepts are emphasized and integrated throughout the book.

The many factors that contributed to the success of the previous editions have been retained. In preparing the Fifth Edition, I considered comments and suggestions of colleagues, students, and many users of the prior edition throughout the country.

What's New in the Fifth Edition?

- **The Martin-Gay Program** has been revised and enhanced with a new design in the text and MyMathLab[®] to actively encourage students to use the text, video program, Video Organizer, and Student Organizer as an integrated learning system.
- **The New Video Organizer** is designed to help students take notes and work practice exercises while watching the Interactive Lecture Series videos (available in MyMathLab and on DVD). All content in the Video Organizer is presented in the same order as it is presented in the videos, making it easy for students to create a course notebook and build good study habits.
 - Covers all of the video examples in order.
 - Provides ample space for students to write down key definitions and properties.
 - Includes “Play” and “Pause” button icons to prompt students to follow along with the author for some exercises while they try others on their own.

The Video Organizer is available in a loose-leaf, notebook-ready format. It is also available for download in MyMathLab.

- **Vocabulary, Readiness & Video Check** questions have been added prior to every section exercise set. These exercises quickly check a student's understanding of new vocabulary words. The **readiness** exercises center on a student's understanding of a concept that is necessary in order to continue to the exercise set. **New Video check questions for the Martin-Gay Interactive Lecture videos** are now included in every section for each learning objective. **These exercises are all available for assignment in MyMathLab** and are a great way to assess whether students have viewed and understood the key concepts presented in the videos.
- **New Student Success Tips Videos** are 3- to 5-minute video segments designed to be daily reminders to students to continue practicing and maintaining good organizational and study habits. They are organized in three categories and

are available in MyMathLab and the Interactive Lecture Series. The categories are:

1. Success Tips that apply to any course in college in general, such as Time Management.
 2. Success Tips that apply to any mathematics course. One example is based on understanding that mathematics is a course that requires homework to be completed in a timely fashion.
 3. Section- or Content-specific Success Tips to help students avoid common mistakes or to better understand concepts that often prove challenging. One example of this type of tip is how to apply the order of operations to simplify an expression.
- **Interactive DVD Lecture Series**, featuring your text author (Elayn Martin-Gay), provides students with active learning at their own pace. The videos offer the following resources and more:
 - A complete lecture for each section of the text** highlights key examples and exercises from the text. “Pop-ups” reinforce key terms, definitions, and concepts.
 - An interface with menu navigation features** allows students to quickly find and focus on the examples and exercises they need to review.
 - Interactive Concept Check** exercises measure students’ understanding of key concepts and common trouble spots.
 - New Student Success Tips Videos.**
 - **The Interactive DVD Lecture Series** also includes the following resources for test prep:
 - The Chapter Test Prep Videos** help students during their most teachable moment—when they are preparing for a test. This innovation provides step-by-step solutions for the exercises found in each Chapter Test. For the Fifth Edition, the chapter test prep videos are also available on YouTube™. The videos are captioned in English and Spanish.
 - The Practice Final Exam Videos** help students prepare for an end-of-course final. Students can watch full video solutions to each exercise in the Practice Final Exam at the end of this text.
 - **The Martin-Gay MyMathLab** course has been updated and revised to provide more exercise coverage, including assignable video check questions and an expanded video program. There are section lecture videos for every section, which students can also access at the specific objective level; Student Success Tips videos; and an increased number of watch clips at the exercise level to help students while doing homework in MathXL. Suggested homework assignments have been premade for assignment at the instructor’s discretion.
 - **New MyMathLab Ready to Go Courses** (access code required) provide students with all the same great MyMathLab features that you’re used to, but make it easier for instructors to get started. Each course includes preassigned homework and quizzes to make creating your course even simpler. Ask your Pearson representative about the details for this particular course or to see a copy of this course.

Key Pedagogical Features

The following key features have been retained and/or updated for the Fifth Edition of the text:

Problem-Solving Process This is formally introduced in Chapter 1 with a four-step process that is integrated throughout the text. The four steps are **Understand, Translate, Solve,** and **Interpret.** The repeated use of these steps in a variety of examples shows

their wide applicability. Reinforcing the steps can increase students' comfort level and confidence in tackling problems.

Exercise Sets Revised and Updated The exercise sets have been carefully examined and extensively revised. Special focus was placed on making sure that even- and odd-numbered exercises are paired and that real-life applications were updated.

Examples Detailed, step-by-step examples were added, deleted, replaced, or updated as needed. Many examples reflect real life. Additional instructional support is provided in the annotated examples.

Practice Exercises Throughout the text, each worked-out example has a parallel Practice exercise. These invite students to be actively involved in the learning process. Students should try each Practice exercise after finishing the corresponding example. Learning by doing will help students grasp ideas before moving on to other concepts. Answers to the Practice exercises are provided at the bottom of each page.

Helpful Hints Helpful Hints contain practical advice on applying mathematical concepts. Strategically placed where students are most likely to need immediate reinforcement, Helpful Hints help students avoid common trouble areas and mistakes.

Concept Checks This feature allows students to gauge their grasp of an idea as it is being presented in the text. Concept Checks stress conceptual understanding at the point-of-use and help suppress misconceived notions before they start. Answers appear at the bottom of the page. Exercises related to Concept Checks are included in the exercise sets.

Mixed Practice Exercises In the section exercise sets, these exercises require students to determine the problem type and strategy needed to solve it just as they would need to do on a test.

Integrated Reviews This unique, mid-chapter exercise set (and notes where appropriate) helps students assimilate new skills and concepts that they have learned separately over several sections. These reviews provide yet another opportunity for students to work with “mixed” exercises as they master the topics.

Vocabulary Check This feature provides an opportunity for students to become more familiar with the use of mathematical terms as they strengthen their verbal skills. These appear at the end of each chapter before the Chapter Highlights. Vocabulary, Readiness & Video exercises provide practice at the section level.

Chapter Highlights Found at the end of every chapter, these contain key definitions and concepts with examples to help students understand and retain what they have learned and help them organize their notes and study for tests.

Chapter Review The end of every chapter contains a comprehensive review of topics introduced in the chapter. The Chapter Review offers exercises keyed to every section in the chapter, as well as Mixed Review exercises that are not keyed to sections.

Chapter Test and Chapter Test Prep Videos The Chapter Test is structured to include those exercises that involve common student errors. The **Chapter Test Prep Videos** gives students instant access to a step-by-step video solution of each exercise in the Chapter Test.

Cumulative Review This review follows every chapter in the text (except Chapter 1). Each odd-numbered exercise contained in the Cumulative Review is an earlier worked example in the text that is referenced in the back of the book along with the answer.

Writing Exercises  These exercises occur in almost every exercise set and require students to provide a written response to explain concepts or justify their thinking.

Applications Real-world and real-data applications have been thoroughly updated, and many new applications are included. These exercises occur in almost every exercise set and show the relevance of mathematics and help students gradually and continuously develop their problem-solving skills.

Review Exercises These exercises occur in each exercise set (except in Chapter 1) and are keyed to earlier sections. They review concepts learned earlier in the text that will be needed in the next section or chapter.

Exercise Set Resource Icons Located at the opening of each exercise set, these icons remind students of the resources available for extra practice and support:

See Student Resources descriptions on page xv for details on the individual resources available.

Exercise Icons These icons facilitate the assignment of specialized exercises and let students know what resources can support them.

-  DVD Video icon: exercise worked on the Interactive DVD Lecture Series.
-  Triangle icon: identifies exercises involving geometric concepts.
-  Pencil icon: indicates a written response is needed.
-  Calculator icon: optional exercises intended to be solved using a scientific or graphing calculator.

Group Activities Found at the end of each chapter, these activities are for individual or group completion, and are usually hands-on or data-based activities that extend the concepts found in the chapter, allowing students to make decisions and interpretations and to think and write about algebra.

Optional: Calculator Exploration Boxes and Calculator Exercises The optional Calculator Explorations provide keystrokes and exercises at appropriate points to give students an opportunity to become familiar with these tools. Section exercises that are best completed by using a calculator are identified by  for ease of assignment.

Student and Instructor Resources

STUDENT RESOURCES

<p>Student Organizer</p> <p>Guides students through the 3 main components of studying effectively—notetaking, practice, and homework.</p> <p>The Organizer includes before-class preparation exercises, notetaking pages in a 2-column format for use in class, and examples paired with exercises for practice for each section. Includes an outline and questions for use with the Student Success Tip Videos. It is 3-hole-punched.</p> <p>Available in loose-leaf, notebook-ready format and in MyMathLab.</p>	<p>Student Solutions Manual</p> <p>Provides completely worked-out solutions to the odd-numbered section exercises; all exercises in the Integrated Reviews, Chapter Reviews, Chapter Tests, and Cumulative Reviews</p>
<p>Interactive DVD Lecture Series Videos</p> <p>Provides students with active learning at their pace. The videos offer:</p> <ul style="list-style-type: none"> ● A complete lecture for each text section. The interface allows easy navigation to examples and exercises students need to review. ● Interactive Concept Check exercises ● Student Success Tips Videos ● Practice Final Exam ● Chapter Test Prep Videos 	<p>Video Organizer</p> <p>Designed to help students take notes and work practice exercises while watching the Interactive Lecture Series videos.</p> <ul style="list-style-type: none"> ● Covers all of the video examples in order. ● Provides ample space for students to write down key definitions and rules. ● Includes “Play” and “Pause” button icons to prompt students to follow along with the author for some exercises while they try others on their own. ● Includes Student Success Tips Outline and Questions <p>Available in loose-leaf, notebook-ready format and in MyMathLab. Answers to exercises available to instructors in MyMathLab.</p>

INSTRUCTOR RESOURCES

<p>Annotated Instructor’s Edition</p> <p>Contains all the content found in the student edition, plus the following:</p> <ul style="list-style-type: none"> ● Answers to exercises on the same text page ● Teaching Tips throughout the text placed at key points 	<p>Instructor’s Resource Manual with Tests and Mini-Lectures</p> <ul style="list-style-type: none"> ● Mini-lectures for each text section ● Additional practice worksheets for each section ● Several forms of test per chapter—free response and multiple choice ● Answers to all items <p>Instructor’s Solutions Manual TestGen[®] (Available for download from the IRC)</p>
<p>Instructor-to-Instructor Videos—available in the Instructor Resources section of the MyMathLab course.</p>	<p>Online Resources</p> <p>MyMathLab[®] (access code required)</p> <p>MathXL[®] (access code required)</p>

Acknowledgments

There are many people who helped me develop this text, and I will attempt to thank some of them here. Emily Keaton and Cindy Trimble were *invaluable* for contributing to the overall accuracy of the text. Dawn Nuttall was *invaluable* for her many suggestions and contributions during the development and writing of this Fifth Edition. Allison Campbell and Lauren Morse provided guidance throughout the production process.

A very special thank you goes to my editor, Mary Beckwith, for being there 24/7/365, as my students say. And my thanks to the staff at Pearson for all their support: Heather Scott, Patty Bergin, Matt Summers, Michelle Renda, Michael Hirsch, Chris Hoag, and Greg Tobin.

I would like to thank the following reviewers for their input and suggestions:

Anita Aikman, <i>Collin County Community College</i>	Sonya Johnson, <i>Central Piedmont Community College</i>
Sheila Anderson, <i>Housatonic Community College</i>	Deborah Jones, <i>High Tech College</i>
Adrienne Arata, <i>College of the Siskiyous</i>	Nancy Lange, <i>Inver Hills Community College</i>
Cedric Atkins, <i>Mott Community College</i>	Jean McArthur, <i>Joliet Junior College</i>
Laurel Berry, <i>Bryant & Stratton College</i>	Carole Shapero, <i>Oakton Community College</i>
Connie Buller, <i>Metropolitan Community College</i>	Jennifer Strehler, <i>Oakton Community College</i>
Lisa Feintech, <i>Cabrillo College</i>	Tanomo Taguchi, <i>Fullerton College</i>
Chris Ford, <i>Shasta College</i>	Leigh Ann Wheeler, <i>Greenville Technical Community College</i>
Cindy Fowler, <i>Central Piedmont Community College</i>	Valerie Wright, <i>Central Piedmont Community College</i>
Pam Gerszewski, <i>College of the Albemarle</i>	
Doug Harley, <i>Del Mar College</i>	

I would also like to thank the following dedicated group of instructors who participated in our focus groups, Martin-Gay Summits, and our design review for the series. Their feedback and insights have helped to strengthen this edition of the text. These instructors include:

Billie Anderson, <i>Tyler Junior College</i>	Dena Frickey, <i>Delgado Community College</i>
Cedric Atkins, <i>Mott Community College</i>	Cindy Gaddis, <i>Tyler Junior College</i>
Lois Beardon, <i>Schoolcraft College</i>	Gary Garland, <i>Tarrant County Community College</i>
Laurel Berry, <i>Bryant & Stratton</i>	Kim Ghiselin, <i>State College of Florida</i>
John Beyers, <i>University of Maryland</i>	Nita Graham, <i>St. Louis Community College</i>
Bob Brown, <i>Community College of Baltimore County–Essex</i>	Kim Granger, <i>St. Louis Community College</i>
Lisa Brown, <i>Community College of Baltimore County–Essex</i>	Pauline Hall, <i>Iowa State College</i>
NeKeith Brown, <i>Richland College</i>	Pat Hussey, <i>Triton College</i>
Gail Burkett, <i>State College of Florida</i>	Dorothy Johnson, <i>Lorain County Community College</i>
Cheryl Cantwell, <i>Seminole Community College</i>	Sonya Johnson, <i>Central Piedmont Community College</i>
Ivette Chuca, <i>El Paso Community College</i>	Irene Jones, <i>Fullerton College</i>
Jackie Cohen, <i>Augusta State College</i>	Ann Jones, <i>Spartanburg Community College</i>
Julie Dewan, <i>Mohawk Valley Community College</i>	Paul Jones, <i>University of Cincinnati</i>
Monette Elizalde, <i>Palo Alto College</i>	Mike Kirby, <i>Tidewater Community College</i>
Kiel Ellis, <i>Delgado Community College</i>	Kathy Kopelousous, <i>Lewis and Clark Community College</i>
Janice Ervin, <i>Central Piedmont Community College</i>	
Richard Fielding, <i>Southwestern College</i>	

Tara LaFrance, <i>Delgado Community College</i>	Linda Padilla, <i>Joliet Junior College</i>
John LaMaster, <i>Indiana Purdue University Fort Wayne</i>	Armando Perez, <i>Laredo Community College</i>
Nancy Lange, <i>Inver Hills Community College</i>	Davidson Pierre, <i>State College of Florida</i>
Judy Langer, <i>Westchester Community College</i>	Marilyn Platt, <i>Gaston College</i>
Lisa Lindloff, <i>McLinnan Community College</i>	Chris Riola, <i>Moraine Valley College</i>
Sandy Lofstock, <i>St. Petersburg College</i>	Carole Shapero, <i>Oakton Community College</i>
Kathy Lovelle, <i>Westchester Community College</i>	Janet Sibol, <i>Hillsborough Community College</i>
Nicole Mabine, <i>North Lake College</i>	Anne Smullen, <i>Mohawk Valley Community College</i>
Jean McArthur, <i>Joliet Junior College</i>	Barbara Stoner, <i>Reading Area Community College</i>
Kevin McCandless, <i>Evergreen Valley College</i>	Jennifer Strehler, <i>Oakton Community College</i>
Ena Michael, <i>State College of Florida</i>	Ellen Stutes, <i>Louisiana State University Eunice</i>
Daniel Miller, <i>Niagara County Community College</i>	Tanomo Taguchi, <i>Fullerton College</i>
Marica Molle, <i>Metropolitan Community College</i>	Robyn Toman, <i>Anne Arundel Community College</i>
Carol Murphy, <i>San Diego Miramar College</i>	MaryAnn Tuerk, <i>Elsin Community College</i>
Charlotte Newsom, <i>Tidewater Community College</i>	Walter Wang, <i>Baruch College</i>
Cao Nguyen, <i>Central Piedmont Community College</i>	Leigh Ann Wheeler, <i>Greenville Technical Community College</i>
Greg Nguyen, <i>Fullerton College</i>	Darlene Williams, <i>Delgado Community College</i>
Eric Oilila, <i>Jackson Community College</i>	Valerie Wright, <i>Central Piedmont Community College</i>

A special thank you to those students who participated in our design review: Katherine Browne, Mike Bulfin, Nancy Canipe, Ashley Carpenter, Jeff Chojnachi, Roxanne Davis, Mike Dieter, Amy Dombrowski, Kay Herring, Todd Jaycox, Kaleena Levan, Matt Montgomery, Tony Plese, Abigail Polkinghorn, Harley Price, Eli Robinson, Avery Rosen, Robyn Schott, Cynthia Thomas, and Sherry Ward.

Elayn Martin-Gay

About the Author

Elayn Martin-Gay has taught mathematics at the University of New Orleans for more than 25 years. Her numerous teaching awards include the local University Alumni Association's Award for Excellence in Teaching, and Outstanding Developmental Educator at University of New Orleans, presented by the Louisiana Association of Developmental Educators.

Prior to writing textbooks, Elayn Martin-Gay developed an acclaimed series of lecture videos to support developmental mathematics students in their quest for success. These highly successful videos originally served as the foundation material for her texts. Today, the videos are specific to each book in the Martin-Gay series. The author has also created Chapter Test Prep Videos to help students during their most “teachable moment”—as they prepare for a test—along with Instructor-to-Instructor videos that provide teaching tips, hints, and suggestions for each developmental mathematics course, including basic mathematics, prealgebra, beginning algebra, and intermediate algebra.

Elayn is the author of 12 published textbooks as well as multimedia, interactive mathematics, all specializing in developmental mathematics courses. She has also published series in Algebra 1, Algebra 2, and Geometry. She has participated as an author across the broadest range of educational materials: textbooks, videos, tutorial software, and courseware. This provides an opportunity of various combinations for an integrated teaching and learning package offering great consistency for the student.

Advertising/marketing

- advertising expenditures, 47
- banner measurements, 561
- billboard painting requirements, 277
- billboard proportions, 323
- Coca-Cola sign measurement, 447
- television advertising expenditures, 105

Agriculture

- apple exportation from U.S., 369
- apple types grown in Washington State, 598
- bamboo growth height, 35, 446, 738
- cherry production in Michigan, 369
- crop values, 431
- farm size, 407
- fencing requirements, 518
- flowering plants native to U.S., 161
- garden measurements, 171, 686, 690, 694
- kelp growth height, 35, 738
- milk cow operation size, 407
- peach production, 21
- sequoia tree diameter, 472
- soybean production, 45
- tree heights, 493, 552, 556–557, 560, 743
- tree trunk areas, 695
- tree trunk girths, 207
- wheat production in selected states, 587, 592, 616, 637

Animals

- bat wingbeats, 328
- bluebird sizes, 210
- cattle lot fencing needed, 694
- cheetah speed, 758
- chimpanzee life expectancy, 728
- cockroach speed, 259, 757
- condor population increase, 37, 664
- cows' grain consumption, 59
- crocodile measurements, 442
- dog households, 279
- eagle incubation period, 734

- elephant life expectancy, 728
- endangered species, 743
- falcon speed, 728
- fish per tank, 561
- flea dip solution, 150
- Gentoo penguin speed, 758
- Giant Ocean Tank volume, 544
- hummingbird incubation period, 734
- hummingbird wingbeats, 328, 757
- kennel volumes, 544
- killer bee and honey bee chasing behaviors, 198
- legal lobster size, 207
- lion cub weights, 229
- lobster weights, 231
- medicine dosage for dogs, 360
- Monarch butterfly migration, 472
- mosquito larvae elimination, 349
- National Zoo annual budget, 329
- pelican beak measurements, 436
- pet food costs, 349
- pheasant speed, 728
- sheep population, 26
- sloth travel time, 198
- termite nest height, 472
- threatened mammal species in selected countries, 170
- threatened species estimation, 21–22, 43
- trout weights, 206, 211, 229
- wasp nest diameter, 516
- whale weights, 322
- wire needed for horse corral, 295

Astronomy/space

- Adler Museum planetarium volume, 544
- Apollo launch gantry height, 561
- astronaut James A. Lovell spaceflight information, 271
- comet tails, 309
- commercial space launches worldwide, 589
- distance between Earth and Moon, 14, 273
- distance between Earth and Sun, 282
- distance of planets from Sun, 113, 309, 313

- Hayden Planetarium dome volume, 544
- Hubble mirror defect, 301
- Mir Space Station orbit altitude, 14
- moon crater diameter, 472
- ozone hole shrinkage, 35
- planet average surface temperatures, 635, 655
- planet day lengths, 119, 260
- planet orbits, 44, 251, 260
- planet radius/diameter calculations, 32, 281, 516
- planets with moons, 238
- solar eclipse durations, 212, 228
- space shuttle cargo compartment volume, 694
- weight of person on Earth, 72

Automotive/motor vehicles

- auto thefts, 374
- car color, 165, 166, 365, 576
- car mileage by categories, 320
- car ownership costs, 265, 269, 280
- car price increases, 405
- car rental unit price, 326
- cars manufactured in Germany and Spain, 730
- car speed, 730
- CUV sales in U.S., 350
- gas mileage calculations, 32, 167, 169, 227, 241, 252, 293, 331, 347, 357
- gasoline mixtures, 343
- motorcycle sales, 26
- motor vehicle exports, 369
- passenger vehicle sales, 170, 314
- purchase price covered by trade-in, 138
- race car speeds and gas mileage, 252
- truck hauling rates, 72
- truck speed, 730
- vehicles produced in North America, 26

Aviation

- aircraft in FedEx air fleet, 161
- airport arrivals/departures, 38

Aviation (continued)

Boeing 747 cruising speed, 472
 flight time calculations, 195
 flying distance between cities, 728
 fuel used per hour, 775
 helium content of Goodyear blimps, 14, 83
 passenger cost to travel by plane, 329

Business

assembly-line defective products, 329
 Barnes & Noble operating loss, 637
 best-buy prices, 415, 433, 694
 better-buy prices, 356, 535, 775
 billable hours, 405
 bolts inspected, 402
 brand values, 44
 Burger King restaurants worldwide, 44
 commission calculations, 410, 414, 425, 428, 429, 431, 628
 commission rate, 411, 413
 consumer price index, 352
 customers ordering lunch at restaurant, 231
 defective pantyhose in batches, 324
 discount amount, 411–412, 414, 428, 429, 431, 496, 775
 earnings before deductions, 756, 757
 employee reduction, 406
 estimated total costs, 46
 Gap Corporation stores worldwide, 27
 Hallmark employees in Kansas City, 138
 hourly pay, 84, 427
 hours worked at furniture store, 619
 IKEA employees by region, 122
 jewelry prices, 159
 Kohl's stores in California and Texas, 729
 Macy's department stores sales, 84
 markup, 731
 net income calculations, 647, 664
 online sales, 189, 220

percent off, 374
 PetSmart employee numbers, 84
 price after discount, 102
 price difference between items, 46
 Procter & Gamble sales, 45
 production numbers, 403
 purchase price before tax, 413, 429
 revenue, 702
 Ritz-Carlton hotel locations, 137
 Safeway-owned store locations, 138
 salary increases, 405
 sale price, 36, 411–412, 425, 428, 431, 496, 775
 sales decrease, 496
 sales tax calculations, 377, 409–410, 412–413, 424–425, 427, 628
 selling price, 414
 separate cost calculations, 725, 730
 shared earnings, 68
 Target sales categories, 181
 Target store locations, 27, 84, 324
 tipping calculations, 415
 total cost before taxes, 107
 total cost of several items, 85, 86, 105, 109
 total earnings, 102
 total price, 412–413, 415, 424–425, 427, 431, 628
 T-shirt costs by size, 59
 unit rate/price, 326–331, 333, 353, 356, 358, 359, 577
 U.S. trade balance, 655
 wholesale cost, 731
 work hours required to complete order, 159, 360, 758, 775
 work shifts at McDonald's, 137

Chemistry/physics

alloy composition, 431, 775
 boiling temperatures of elements, 639
 calories burned/needed during activities, 480–483, 491, 494
 carbon subnitride burning temperature, 478
 converting BTUs to foot-pounds, 480, 482, 491, 494
 decibel levels of common sounds, 37

energy required for lifting, 479, 481, 482–483, 491, 494
 melting points of elements, 664
 oxygen supply rates provided by lawns, 349
 radio wave travel distance, 282
 saline solution amounts, 490, 757, 758
 weight conversions, 449–450, 453, 629, 775

Demographics/populations

armed forces population, 595–596
 coaches and scouts employed in U.S., 407
 dietitians employed in U.S., 407
 employees in service-industry jobs, 350
 executives age 40, 366
 fastest growing occupations, 371, 422
 fraction of employees who are men/women, 119
 full-time workers in U.S., 399
 hospital beds per population, 757
 Iceland's population, 13
 Maori population of New Zealand, 152
 movie/television business with 100 or fewer employees, 403
 Native American population, 729
 part-time workers in U.S., 399–400
 population increases/decreases/densities, 44, 102, 260, 401, 404, 405, 407, 424, 431, 601
 population of largest cities, 588
 population of sheep vs. people in New Zealand, 26
 population over age 65, 60, 406
 population projections/estimates, 25, 36, 102, 276, 328, 406, 590
 restaurant owners in entry-level positions, 377
 states with federal Indian reservations, 120
 tourist numbers projected for China and Spain, 729

unemployed population in U.S., 370
 U.S. city and state populations, 152
 U.S. population under age 18, 370
 U.S. states designated as “commonwealths,” 324
 veterinarians focusing on horses, 377
 veterinarians in private practice, 377
 violent crime decreases, 427
 visitors to carnivals, fairs, festivals, 14
 visitors to U.S. by region, 593–594, 625
 volunteer activities in U.S., 370
 world population by continent, 378

Education

associate degrees awarded, 406
 bachelor degrees awarded, 406
 book costs at college, 403
 book measurements, 447
 class enrollment, 72
 classroom floor space per student, 347
 college enrollment, 44, 398, 403
 college enrollment increase, 46
 college library reading promotion, 39
 college majors, 139, 149
 college students’ Internet use, 369
 college students’ living arrangements, 597
 college students living at home, 680
 college students’ spending categories, 221
 college students’ use of time, 180
 daycare attendance, 402
 exercises completed in 30 minutes, 577
 faculty percent increase, 496
 favorite subjects of students ages 10 to 17, 199
 freshmen in high school, 398–399
 full and associate professor salaries, 332

grade point averages, 604, 607, 621, 626
 Head Start enrollment increase, 46
 high school teachers in U.S., 407
 law school applications, 346
 library books available, 328
 math enrollments, 427
 math quiz scores, 602
 maze completion experiment, 603
 number of freshman students, 119, 577
 number of sophomore students, 120
 number of students on bus, 152
 percent of students who are freshmen, 365
 persons completing 4 or more years of college, 618
 public school enrollment, 331
 public schools in U.S., 103
 scholarship applicants to Yale, 401
 student government fundraiser, 38
 student government presidential elections, 38
 students living at home, 366
 teacher salaries, 79–80
 teachers’ taxable income, 257
 test scores, 46, 137, 625–626
 textbook costs, 58, 259
 time spent on homework/ studying, 235, 239
 total semester bill, 86
 tuition costs, 104, 406
 universities with largest enrollments, 728

Electronics/computers

Apple MacBook thinness, 259
 cable TV system percent decrease, 406
 CD track length, 472
 cell phone towers in U.S., 407
 characters per line of print on computer, 59
 computer board assembly rates, 330
 computer chip measurements, 228
 computer disk storage capacity, 293

cost of blank CDs, 79
 cost of DVD players, 79, 361
 defective components, 405
 digital camera measurements, 151
 diskette width, 472
 DVD storage capacity, 314
 Facebook usage, 101
 Great Internet Mersenne Prime Number Search, 14
 height of stack of CDs, 491
 Internet usage, 85–86, 101, 407
 iPhone area, 281
 iPhone measurements, 270
 iPod measurements, 269, 282
 megabytes of information held by CDs and DVDs, 54, 59
 patents granted to Apple Inc., 129
 personal computers in use by country, 730
 pixel calculations, 59
 printer cartridge weights, 315
 printer pages per minute, 54
 printer paper amounts, 348
 printer shipments, 69
 smartphone ownership, 152
 smartphone sales in U.S., 350
 song download card sharing, 171
 video and CD sales decreases, 637
 video games costs, 728
 word processor speed, 346
 Xbox 360 costs, 728

Finance, general

bank costs, 105
 coin values, 272–273
 compound interest, 418, 419, 421, 425, 428, 431
 investment interest, 417, 418, 420, 428, 429
 monthly payment calculations, 419, 421
 national debt of France, 16
 simple interest, 416, 420, 421, 425, 428, 429, 431, 628, 681, 694, 735
 stock market losses, 664
 stock prices, 169
 tax return preparation times, 211
 tax revenue from travel industry, 45
 tipping calculations, 415
 U.S. annual inflation rate, 624

Finance, personal

car payments, 358
 change back from purchase, 268
 checking account balance, 85,
 304, 591, 654, 676, 679
 credit card balance, 295, 654
 dividend received, 403
 electronically filed tax returns
 per year, 719
 investment yield, 358
 loan payments, 85, 310, 677
 monthly budget, 620
 online spending per month, 600
 pay calculations, 405
 rent expenditures, 374
 savings account balances, 36,
 103, 681

Food/nutrition

apple usage, 231
 bruised tomatoes in
 shipment, 324
 calories from fat, 149, 404–405
 calories in food items, 84, 328
 calories in milk types, 406
 calories in tea, 348
 candy weight, 213, 489, 494
 canned foods packing calculations,
 105, 432
 cheesecake calories, 84
 cheese in recipe, 226
 cheese pallet packing
 calculations, 58
 chocolate-consuming countries,
 271–272
 cholesterol in food, 350
 cilantro in recipe, 239
 cocoa bean storage, 279
 coffee drinking rate of
 adults, 360
 cola liter-to-quarts
 conversion, 491
 combined weight of ground
 round, 315
 cookies mailing weight, 451
 cost of each of several items, 311
 dried fruit preservative
 amounts, 457
 fat content, 58, 59, 104, 159, 280
 fiber content of selected
 foods, 589
 flour amount ordered/
 received, 490

flour in recipe, 150, 228, 348, 351,
 496, 757
 food order cost comparisons, 85
 food sales in U.S. annually, 589
 Girl Scout cookie sales, 199
 hamburger meat calculations, 206
 homemade ice cream brine
 solution, 350
 honey amounts in recipe, 176–177
 hot dogs consumed in U.S., 84
 ice cream amounts eaten per
 year, 323
 ice cream cones sold, 401
 ice cream cone volume, 543
 iced tea remaining at party, 490
 maple syrup weights, 490
 milk beverage types
 consumed, 602
 milk in recipe, 351
 M&Ms color distribution, 598
 nacho chips unit price, 327
 olive oil calories, 58
 ounces of soda in case, 314
 oven setting conversion, 491
 peaches (canned) weight, 236
 picante sauce unit price, 326
 pizza measurements, 694
 pizza preferences, 426
 preference rate for Coke and
 Pepsi, 348
 punch ingredients, 239
 rice weights, 457
 soft drink bottle/carton
 weights, 457
 soft drink consumption by teen-
 age males, 76
 soup stock recipe amounts, 490
 sugar calories, 109
 sugar in candy bar, 308
 sugar in recipe, 180, 226, 350, 757
 sunflower serving weights, 457
 tuna (canned) calories, 84
 turkey price per pound, 293
 unit prices for food items,
 330–331
 vitamin A content in cherries, 370

Geography/geology

aluminum prices, 159
 aluminum production in
 China, 377
 area of Yellowstone National
 Park, 83

Black Canyon depth/width, 446
 Colorado area calculations, 54
 common city names in U.S., 83
 countries with small land
 areas, 322
 creek sediment, 446
 dam heights, 36, 601
 dams by continent, 599
 deep-sea diving depths, 646,
 676, 679
 depths below Earth's
 surface, 675
 elevation changes, 677, 679
 elevation differences, 654, 679
 Grand Canyon depth/width, 446
 highest/lowest elevations,
 651, 654
 highest point in selected
 states, 14
 lake elevations, 638, 654,
 676, 679
 land area of continents, 597
 Meteor Crater, Arizona,
 distance around, 525
 Mississippi River Basin
 drainage, 35
 mountain heights, 15, 25, 36, 46,
 73, 301, 323, 636, 656, 675
 national monuments, 137
 national parks, 135, 139, 200,
 221, 279
 ocean measurements/depths,
 199, 446, 599, 636, 637, 648,
 656, 664, 679
 pond ice thickness, 446
 river lengths, 77–78, 242
 states adjacent to other states, 141
 surface areas of continents, 181
 tornadoes for a single day in
 U.S., 330
 uranium production in
 Canada, 377
 U.S. boundary calculations, 84
 Utah area calculations, 535
 wildfires in U.S., 587–588, 708
 Wyoming area calculations, 54

Geometry

area of circle, 530–532, 682, 694
 area of geometric figures, 169,
 230, 528–529, 531, 569, 572,
 741, 742
 area of parallelogram, 682

area of rectangle, 54, 57–59, 86, 104, 105, 109, 228, 281, 302, 432, 447, 474, 489, 495, 686, 690, 693–695, 711, 736, 740, 774

area of square, 86, 91, 94, 106, 107, 314, 711, 736

area of triangle, 299, 302, 310, 313, 627, 741, 742

circle measurements, 238

circumference of circle, 277, 280, 282, 309, 313, 521, 524, 526

circumference of geometric figures, 525

diameter of circle, 150, 742

diameter of sphere, 516

inner diameter measurements, 199

inner diameter of circle, 228

Khafre's Pyramid angles, 507

magic squares, 672

outer diameter of circle, 228

partial lengths and widths, 199

perimeter of geometric figures, 20, 24, 95, 102, 170, 179, 198, 212, 230, 236, 241, 242, 478, 519–520, 522–524, 545, 570, 572, 574, 693, 742

perimeter of parallelogram, 198, 671

perimeter of pentagon, 421

perimeter of rectangle, 25, 27, 47, 57, 82, 109, 151, 160, 166, 167, 171, 176, 179, 198, 229, 235, 236, 238, 241, 421, 432, 478, 517, 577, 627, 671, 686, 774

perimeter of square, 27, 94, 109, 160, 176, 179, 229, 236, 269, 309, 314, 421, 478, 518, 575, 671, 681, 690

perimeter of triangle, 20, 47, 179, 198, 269, 309, 313, 478, 518–519, 671, 690, 694

radius of circle, 150

radius of sphere, 516

ratio calculations, 320, 322–324, 333, 358, 359, 496, 577, 627, 742, 774

side lengths of geometric figures, 238, 295

unknown lengths, 223–224

Vietnam Veterans Memorial wall angles, 507

volume conversion, 775

volume of ball, 538–539, 682

volume of birdbath, 542

volume of block of ice, 543

volume of box, 222–223, 228, 474, 538, 542, 573, 682, 694

volume of circular cylinder, 539–540, 542, 544, 570, 571

volume of cone, 540, 542

volume of cube, 735

volume of ice chest, 543

volume of snow globe, 543

volume of solid figures, 541–542, 545, 570, 573, 575

volume of sphere, 542

volume of square-based pyramid, 540, 542, 543, 570

volume of suitcase, 231

volume of waffle ice cream cone, 543

Home improvement

area of wall, 533

baseboard around room, 575

board length measurements, 183, 195, 211, 228, 239, 241, 438, 447

bookcase shelving, 229

bricks laid per minute, 330

bricks needed for building, 534

carpet needed for room, 570

cleaning solution ingredients, 228

clock circumference, 521

copper tubing requirements, 229

deck post depth to be buried, 150

deck railing measurements, 271

desk measurements, 562

doorway height, 281

driveway sealant needed, 570

dust and dirt trapped by lawns, 329

fencing requirements, 25, 518, 523

fertilizer needed, 277, 289, 293, 311, 344–345, 347, 496

floor tiles needed, 447

garden length, 80–81

garden wall/border measurement, 226, 271

gas/oil ratio for equipment, 350

grass seed needed, 534

gutter measurements and costs, 25

house cleaning, 236

insecticide needed for lawn, 313, 575

insulation for attic floor, 533

invisible fence wire needed, 25

irrigation device circumference, 521

land dimensions, 552

lawn dimensions, 741

metal strip around workbench, 523

paint costs, 109, 775

paint needed for walls, 289, 292, 344

perimeter of room, 519–520

perimeter of square tabletop, 518

pesticide coverage of garden, 357

pipe length, 228

plywood stacking, 234

room perimeter, 694

screw depth, 149

sheetrock stacking, 229

shelf paper measurements, 236

shingles needed for trapezoid-shaped roof, 534

sidewalk length, 549

sidewalk measurements, 194

sidewalk width, 150

spa circumference, 521

volume of air in room, 573

volume of 3 drawers in chest, 571

wallpaper border/strip costs, 520, 524

window area, 536

Medicine/health

allergy shot reaction times, 69

aspirin usage, 181, 369

blood cholesterol levels, 36

blood type calculations, 138–139, 301, 323, 371, 624

body surface area calculations, 473

body temperature conversion, 476, 494

bone components, 371

crutch adjustments, 211

drug dosage ranges, 474

Medicine/health (continued)

drug/medicine dosage calculations, 159, 293, 343–344, 350–351, 628
 drug testing results, 614
 eyeglass cost, 269
 female veterinarians in private practice, 403
 fluid intake measurements, 26
 height measurements for adults, 265–266, 281, 625
 height measurements for children, 472, 776
 home health aide earnings, 83
 hospital beds per population, 757
 human index finger length, 349
 ibuprofen tablet weights, 472
 lung weight differences, 472
 medication amounts for purchase, 472
 medications per emergency room visit, 350
 muscles used to smile and frown, 84
 nurse shortages, 729
 nurses needed in Florida, 398
 nursing job openings due to retirement, 398
 organ transplant patients in U.S., 13
 physician assistant employment projections, 403
 pulse rates, 607
 rehabilitation using treadmill, 159
 skin weight, 472
 sneeze speed, 472
 sodium recommendation per week, 86
 Sudafed strength measurements, 457
 veterinarian employment projections, 403
 veterinarians in private practice, 377
 vitamin C tablet weights, 472
 waist measurement, 150
 weight measurements for adults, 442, 446, 457
 weight measurements for children, 451
 wrist measurement, 150

Miscellaneous

amount and percent increase, 406
 antenna height, 552
 apartments in building calculations, 58
 area covered by house on lot, 80
 area of concrete block, 533
 area of double roll of wallpaper, 533
 area of page in book, 533
 area of table mat, 533
 area of watch face, 533
 art dealer inventory, 120
 bar soap unit price, 327
 books in stack, 229
 boxes of crayons used, 293
 building heights, 556, 560, 571
 card suit choosing outcomes, 614
 cement weight per bag, 454
 charity fund drive collections, 427
 choosing colored marbles from a bag, 120
 choosing numbers from a bag, 626
 circular rug area, 694
 city block diagonal length, 552
 clothing design material requirements, 156, 227
 coal delivery amounts, 457
 coin production by U.S. Mint, 122
 coin production times, 231
 coins metal composition, 227, 377
 coin toss outcomes, 609, 610, 617–618, 621
 consumer spending categories, 241
 crayon usage, 329
 Crazy Horse sculpture dimensions, 445
 days in March, 119
 die rolling outcomes, 609, 610, 613, 614, 622, 626, 629, 682
 digital camera preferences, 576
 drinking glass packing calculations, 107
 elevator allowable weight per person, 454
 elevator speed, 348
 Empire State Building height, 350
 fabric on bolt of cloth, 488
 flagpole height, 447

fountain height, 560
 framing material needed, 488
 frayed sash cord lengths, 447
 fundraiser collections, 623
 furniture costs, 259
 gift paper measurements, 236
 glass needed in picture frame, 533
 grain waste in American homes, 377
 grocery scanning rate, 330
 Habitat for Humanity affiliates, 329
 Heifer International locations, 122
 households with cell phones only, 369
 households with landlines only, 369
 human chain length, 47
 Internet searches about restaurant foods, 370
 land measurements, 534, 552
 legality of fireworks in states, 120
 letter choosing outcomes, 612
 mail volume, 46, 221
 mail weight, 239
 marble color choosing outcomes, 611, 613, 622, 629
 material needed for drapery panels, 533
 material needed for scarves, 494
 metal strip lengths, 156
 microwave oven ownership, 427
 mural measurements, 322
 Nobel Prize winners per country, 74
 number of times “Are we there yet?” asked during road trips, 599
 number-then-vowel choosing outcomes, 612
 oil prices, 309
 oil remaining in drum, 493
 pages remaining to read in book, 35
 paper money life expectancy, 227
 paper recycling, 370
 park dimensions, 562
 pay before taxes, 280
 paychecks received in one year, 85
 penny abolishment survey, 377

Pentagon's outer wall, 137
 piano practice times, 176, 211
 picture frame measurements, 694
 plastic pipe lengths, 211
 postal revenue from each item, 86
 postal service delivery rates, 269
 postcard length, 447
 price comparisons, 109
 print area on page, 561
 proofreading pages, 102
 proportion calculations, 339–340, 356, 358, 359
 public television licensees, 122
 PVC pipe needed for project, 166
 radio station formats, 303
 redwood log cutting lengths, 447
 ribbon lengths, 239
 room cleaning times, 211
 rope length measurements, 72, 438–439, 446
 scarf lengths, 236, 442
 seats in lecture hall, 58
 Seattle Space Needle height, 560
 shadow cast by flagpole, 561
 shadow cast by tree, 561
 shipping boxes needed, 292
 shipping orders, 78–79
 shoe polish amounts, 490
 soil needed to fill hole, 575
 song downloads for each person, 69
 spinner outcomes, 612–613, 621, 622, 626
 stacked boxes depth, 446
 Statue of Liberty measurements, 211, 349, 446
 swimming pool measurements, 322
 tall buildings by continent, 620
 tanning lotion applications, 348
 tea bags produced in one day, 60
 text messages sent monthly, 270
 time spent in personal care activities, 269
 total cost of an order for DVDs, 55
 total land area, 105
 tower height, 575
 tree section lengths, 447
 types of books at library, 598
 typing speeds, 406

UPS delivery fleet, 15
 UPS tracking requests per day, 14
 U.S. flag measurements, 230
 Vietnam Veterans Memorial wall length, 494
 waiting time at post office, 251
 waste disposal budget, 374
 waste dumping charges, 427
 water bills, 257
 wedding expenditures, 308, 403
 weight conversions, 449–450, 453, 629
 window washing calculations, 61
 wireless-only households, 301
 words per book estimates, 55
 working parents' time spent caring for others, 221

Politics

Congressmen who were Boy Scouts, 37
 electoral votes Florida vs. California, 727
 electoral votes Ohio vs. South Carolina, 727
 presidents born in Ohio, 119
 registered voters in Delaware, 328
 rulers in Liechtenstein, 728
 rulers in Norway, 728
 votes cast per candidate, 738
 votes in presidential election, 103

Real estate

acreage for single-family homes, 224–225
 commission calculations, 377, 410, 414, 415, 577, 730
 fencing needed for lot, 520
 home loan interest, 420
 home prices, 405
 home value changes, 428
 house sale profits, 82
 land purchases, 238
 lots per acre, 227
 new home construction, 618
 seller's profit, 730
 selling price of house, 414

Recreation/entertainment

Appalachian Trail mileage by state, 397
 best-selling albums in U.S., 589

card game scores, 646, 647, 661
 favorite music types, 624
 Ferris wheel measurements, 281
 film ratings, 141, 332
 films released in 3-D and 2-D, 323
 frequent moviegoer population of U.S./Canada, 403
 independent films released, 323
 indoor cinema sites in U.S., 407
 kite stick lengths, 447
 Lego bricks sales, 83
 lottery winnings, 72, 78, 82, 328, 329
 Monopoly money requirements, 83
 movie attendance, 149
 movie screen area, 694
 movie ticket costs, 105, 270
 museum attendance, 16, 84
 music industry revenue, 407
 music video shipments value, 261
 Netflix revenue, 279
 opening day film income, 15
 play attendance increase, 401
 Razor scooters, 83
 roller coaster rides, 260, 279
 roller coasters per amusement park, 146
 television households, 251
 ticket prices and sales, 55, 59, 315, 407
 tickets sold per moviegoer, 329
 top grossing American movies, 261, 355
 top-grossing concert tour, 329
 triangular sail dimensions, 571
 TV actors' incomes per show episode, 757, 758
 U.S. theater screens by type, 182
 video game ratings, 138

Sports

artificial climbing wall height, 405
 artificial turf needed to cover football field, 169
 average baseball player's salary, 45, 107, 329
 baseball caps sold, 137
 baseball field foul lines, 523
 baseball hits, 348
 baseball home run distance, 523
 baseball's Hank Aaron career RBIs, 26

Sports (continued)

basketball baskets made/
 attempted, 346
 basketball court measurements/
 area, 322, 690, 694
 basketball free throws attempt-
 ed/made, 165, 369, 426, 680
 basketball points scored, 44, 61,
 294, 729, 741
 birth dates of track stars, 27
 Boston Marathon participation,
 36, 259
 car racing speeds, 261, 293
 distance across baseball
 diamond, 571
 female/male Marathon
 finishers, 324
 football field measurements,
 549, 552
 football field perimeter, 523
 football passes completed/
 attempted, 357
 football points scored, 15, 84,
 294, 729, 741
 football punt length, 260
 football touchdowns made, 73

 record high and low tempera-
 tures, 636, 644, 648, 654, 657
 snowfall measurements, 236, 270
 temperature changes over time,
 644, 647, 654, 664, 676, 677
 temperature highs and lows, 36,
 85, 592
 tornado occurrences, 37, 151
 tornado wind speeds, 617
 tropical storms that became
 hurricanes, 119
 wind speeds, 269, 295

Time/distance

conversions of distance, 119, 137,
 166, 281, 293, 309, 310, 494,
 629, 681

conversions of time, 82, 119
 distance between cities, 25, 36,
 46, 102, 284, 309, 313, 362,
 472, 724–725, 728
 distance between wall and
 buildings, 447
 distance calculations, 177
 distance estimation on maps
 and blueprints, 42, 46,
 342–343, 347, 354, 357, 360,
 433, 628
 distance needed to balance
 boards, 351
 distance needed to lift weight
 on board, 351
 distance traveled on trip, 46, 103
 hiking/walking distance, 149, 167
 jogging/running distance, 177,
 180, 183
 miles traveled in selected num-
 ber of hours, 755, 756, 758
 odometer readings, 35
 time to travel selected number
 of hours, 758
 unit rate of speed, 774

Transportation

airline passenger average cost
 per mile, 280
 bridge caisson measurements, 281
 bridge lengths, 76, 83, 251, 494
 bridges per highway miles, 72
 cell phone use while driving, 324
 cinders purchased for road-
 way, 489
 distance driven by each
 driver, 489
 driving speed at selected hours
 driven, 709
 driving times at selected
 speeds, 709
 English Channel Tunnel
 length, 251
 gasoline cost/prices, 256, 269,
 271, 433, 664
 highway mileage in selected
 states, 28
 highway sound barrier length,
 361, 446
 highway speed limits, 181, 471
 lane divider placement, 72
 leisure travel in U.S., 370
 light pole placement, 72
 mileage categories, 151

miles driven by adults per week, 293, 590
 miles driven on trip, 35, 46
 miles driven per amount of gasoline, 330
 overweight luggage sizes, 210
 parking lot dimensions, 82
 parking sign dimensions, 332
 pontoon bridges, 212
 railroad track gauge, 227
 railroad track inspection, 180
 road congestion causes, 181
 speed after braking, 561
 stop sign perimeter, 523
 time to drive certain number of miles, 360
 vessels passing through Suez Canal, 279
 weight of truck load, 194

World records

deepest bat colony, 632
 deepest cave, 632
 deepest hole drilled in Earth's crust, 656
 driest city, 270

fastest computer, 16
 first bipedal robot, 359
 heaviest baby, 457
 heaviest zucchini, 457
 highest freestanding tower, 14
 highest recorded temperature, 720
 highest temperature produced in lab, 478
 highest town, 14
 hottest temperature recorded, 494
 largest bridge in New York, 83
 largest cereal bowl, 514, 536, 544
 largest cities, 588
 largest commercial building, 59
 largest free-floating soap bubble, 543
 largest hotel lobby, 59
 largest ice cream sundae, 494
 largest illuminated indoor advertising sign, 533
 largest inflatable beach ball, 543
 largest Monopoly board, 27
 largest pearl, 525

largest permanent maze, 37
 largest pizza, 533
 largest pontoon bridge, 212
 largest pumpkin pie, 514, 536
 largest round barn, 524
 largest stairway, 331
 largest suspension bridge, 281
 largest truck, 447
 largest university enrollment, 728
 largest U.S. flag, 533
 largest yacht, 359
 lightest handheld mobile phone, 228
 lowest recorded temperature, 720
 shortest man, 446
 slowest mammal, 198
 smallest baby, 457
 smallest cathedral, 545
 smallest jigsaw puzzle, 27
 snowiest city, 270
 tallest buildings, 13, 20, 77, 607
 tallest man, 446
 tallest roller coaster, 260
 tallest tree, 560
 tallest waterfall, 26

Interactive Lecture Series

Sections

- 1.1 Study Skill Tips for Success in Mathematics
 - 1.2 Place Value, Names for Numbers, and Reading Tables
 - 1.3 Adding Whole Numbers and Perimeter
 - 1.4 Subtracting Whole Numbers
 - 1.5 Rounding and Estimating
 - 1.6 Multiplying Whole Numbers and Area
 - 1.7 Dividing Whole Numbers
- Integrated Review**—
Operations on Whole Numbers
- 1.8 An Introduction to Problem Solving
 - 1.9 Exponents, Square Roots, and Order of Operations

Check Your Progress

- Vocabulary Check
- Chapter Highlights
- Chapter Review
- Chapter Test

Whole numbers are the basic building blocks of mathematics. The whole numbers answer the question “How many?”

This chapter covers basic operations on whole numbers. Knowledge of these operations provides a good foundation on which to build further mathematical skills.

For more information about the resources illustrated above, read Section 1.1.

1.1 Study Skill Tips for Success in Mathematics

Objectives

- A** Get Ready for This Course.
- B** Understand Some General Tips for Success.
- C** Know How to Use This Text.
- D** Know How to Use Video and Notebook Organizer Resources.
- E** Get Help as Soon as You Need It.
- F** Learn How to Prepare for and Take an Exam.
- G** Develop Good Time Management.

Helpful Hint

MyMathLab® and MathXL®

When assignments are turned in online, keep a hard copy of your complete written work. You will need to refer to your written work to be able to ask questions and to study for tests later.

Before reading Section 1.1, you might want to ask yourself a few questions.

1. When you took your last math course, were you organized? Were your notes and materials from that course easy to find, or were they disorganized and hard to find—if you saved them at all?
2. Were you satisfied—really satisfied—with your performance in that course? In other words, do you feel that your outcome represented your best effort?

If the answer is “no” to these questions, then it is time to make a change. Changing to or resuming good study skill habits is not a process you can start and stop as you please. It is something that you must remember and practice each and every day. To begin, continue reading this section.

Objective A Getting Ready for This Course

Now that you have decided to take this course, remember that a *positive attitude* will make all the difference in the world. Your belief that you can succeed is just as important as your commitment to this course. Make sure you are ready for this course by having the time and positive attitude that it takes to succeed.

Make sure that you are familiar with the way that this course is being taught. Is it a traditional course, in which you have a printed textbook and meet with an instructor? Is it taught totally online, and your textbook is electronic and you e-mail your instructor? Or is your course structured somewhere in between these two methods? (Not all of the tips that follow will apply to all forms of instruction.)

Also make sure that you have scheduled your math course for a time that will give you the best chance for success. For example, if you are also working, you may want to check with your employer to make sure that your work hours will not conflict with your course schedule.

On the day of your first class period, double-check your schedule and allow yourself extra time to arrive on time in case of traffic problems or difficulty locating your classroom. Make sure that you are aware of and bring all necessary class materials.

Objective B General Tips for Success

Below are some general tips that will increase your chance for success in a mathematics class. Many of these tips will also help you in other courses you may be taking.

Most important! Organize your class materials. In the next couple pages, many ideas will be presented to help you organize your class materials—notes, any handouts, completed homework, previous tests, etc. In general, you **MUST** have these materials organized. All of them will be valuable references throughout your course and when studying for upcoming tests and the final exam. One way to make sure you can locate these materials when you need them is to use a three-ring binder. This binder should be used solely for your mathematics class and should be brought to each and every class and/or lab. This way, any material can be immediately inserted in a section of this binder and will be there when you need it.

Form study groups and/or exchange names and e-mail addresses. Depending on how your course is taught, you may want to keep in contact with your fellow students. Some ways of doing this are to form a study group—whether in person or through the Internet. Also, you may want to ask if anyone is interested in exchanging e-mail addresses or any other form of contact.

Choose to attend all class periods. If possible, sit near the front of the classroom. This way, you will see and hear the presentation better. It may also be easier for you to participate in classroom activities.

Do your homework. You've probably heard the phrase "practice makes perfect" in relation to music and sports. It also applies to mathematics. You will find that the more time you spend solving mathematics exercises, the easier the process becomes. Be sure to schedule enough time to complete your assignments before the due date assigned by your instructor.

Check your work. Review the steps you took while working a problem. Learn to check your answers in the original exercises. You may also compare your answers with the "Answers to Selected Exercises" section in the back of the book. If you have made a mistake, try to figure out what went wrong. Then correct your mistake. If you can't find what went wrong, **don't** erase your work or throw it away. Show your work to your instructor, a tutor in a math lab, or a classmate. It is easier for someone to find where you had trouble if he or she looks at your original work.

Learn from your mistakes and be patient with yourself. Everyone, even your instructor, makes mistakes. (That definitely includes me—Elayn Martin-Gay.) Use your errors to learn and to become a better math student. The key is finding and understanding your errors.

Was your mistake a careless one, or did you make it because you can't read your own math writing? If so, try to work more slowly or write more neatly and make a conscious effort to carefully check your work.

Did you make a mistake because you don't understand a concept? Take the time to review the concept or ask questions to better understand it.

Did you skip too many steps? Skipping steps or trying to do too many steps mentally may lead to preventable mistakes.

Know how to get help if you need it. It's all right to ask for help. In fact, it's a good idea to ask for help whenever there is something that you don't understand. Make sure you know when your instructor has office hours and how to find his or her office. Find out whether math tutoring services are available on your campus. Check on the hours, location, and requirements of the tutoring service.

Don't be afraid to ask questions. You are not the only person in class with questions. Other students are normally grateful that someone has spoken up.

Turn in assignments on time. This way, you can be sure that you will not lose points for being late. Show every step of a problem and be neat and organized. Also be sure that you understand which problems are assigned for homework. If allowed, you can always double-check the assignment with another student in your class.

Objective C Knowing and Using Your Text

Flip through the pages of this text or view the e-text pages on a computer screen. Start noticing examples, exercise sets, end-of-chapter material, and so on. Every text is organized in some manner. Learn the way this text is organized by reading about and then finding an example in your text of each type of resource listed below. Finding and using these resources throughout your course will increase your chance of success.

- *Practice Exercises.* Each example in every section has a parallel Practice exercise. As you read a section, try each Practice exercise after you've finished the corresponding example. Answers are at the bottom of the page. This "learn-by-doing" approach will help you grasp ideas before you move on to other concepts.
- *Symbols at the Beginning of an Exercise Set.* If you need help with a particular section, the symbols listed at the beginning of each exercise set will remind you of the resources available.

Helpful Hint

MyMathLab® and MathXL®

If you are doing your homework online, you can work and re-work those exercises that you struggle with until you master them. Try working through all the assigned exercises twice before the due date.

Helpful Hint

MyMathLab® and MathXL®

If you are completing your homework online, it's important to work each exercise on paper before submitting the answer. That way, you can check your work and follow your steps to find and correct any mistakes.

Helpful Hint

MyMathLab® and MathXL®

Be aware of assignments and due dates set by your instructor. Don't wait until the last minute to submit work online.

- **Objectives.** The main section of exercises in each exercise set is referenced by an objective, such as **A** or **B**, and also an example(s). There is also often a section of exercises entitled “Mixed Practice,” which is referenced by two or more objectives or sections. These are mixed exercises written to prepare you for your next exam. Use all of this referencing if you have trouble completing an assignment from the exercise set.
- **Icons (Symbols).** Make sure that you understand the meaning of the icons that are beside many exercises.  tells you that the corresponding exercise may be viewed on the video Lecture Series that corresponds to that section.  tells you that this exercise is a writing exercise in which you should answer in complete sentences.  tells you that the exercise involves geometry.
- **Integrated Reviews.** Found in the middle of each chapter, these reviews offer you a chance to practice—in one place—the many concepts that you have learned separately over several sections.
- **End-of-Chapter Opportunities.** There are many opportunities at the end of each chapter to help you understand the concepts of the chapter.

Vocabulary Checks contain key vocabulary terms introduced in the chapter.

Chapter Highlights contain chapter summaries and examples.

Chapter Reviews contain review problems. The first part is organized section by section and the second part contains a set of mixed exercises.

Chapter Tests are sample tests to help you prepare for an exam. The Chapter Test Prep Videos found in the Interactive Lecture Series, MyMathLab, and YouTube provide the video solution to each question on each Chapter Test.

Cumulative Reviews start at Chapter 2 and are reviews consisting of material from the beginning of the book to the end of that particular chapter.

- **Student Resources in Your Textbook.** You will find a **Student Resources** section at the back of this textbook. It contains the following to help you study and prepare for tests:

Study Skill Builders contain study skills advice. To increase your chance for success in the course, read these study tips and answer the questions.

Bigger Picture—Study Guide Outline provides you with a study guide outline of the course, with examples.

Practice Final provides you with a Practice Final Exam to help you prepare for a final.

- **Resources to Check Your Work.** The **Answers to Selected Exercises** section provides answers to all odd-numbered section exercises and to all integrated review, chapter review, chapter test, and cumulative review exercises. Use the **Solutions to Selected Exercises** to see the worked-out solution to every other odd-numbered exercise.

Helpful Hint

MyMathLab®

In MyMathLab, you have access to the following video resources:

- Lecture Videos for each section
- Chapter Test Prep Videos

Use these videos provided by the author to prepare for class, review, and study for tests.

Objective D Knowing and Using Video and Notebook Organizer Resources

Video Resources

Below is a list of video resources that are all made by me—the author of your text, Elayn Martin-Gay. By making these videos, I can be sure that the methods presented are consistent with those in the text.

- **Interactive DVD Lecture Series.** Exercises marked with a  are fully worked out by the author on the DVDs and within MyMathLab. The lecture series provides approximately 20 minutes of instruction per section and is organized by Objective.

- *Chapter Test Prep Videos.* These videos provide solutions to all of the Chapter Test exercises worked out by the author. They can be found in MyMathLab, the Interactive Lecture series, and YouTube. This supplement is very helpful before a test or exam.
- *Student Success Tips.* These video segments are about 3 minutes long and are daily reminders to help you continue practicing and maintaining good organizational and study habits.
- *Final Exam Videos.* These video segments provide solutions to each question. These videos can be found within MyMathLab and the Interactive Lecture Series.

Notebook Organizer Resources

The resources below are in three-ring notebook ready form. They are to be inserted in a three-ring binder and completed. Both resources are numbered according to the sections in your text to which they refer.

- *Video Organizer.* This organizer is closely tied to the Interactive Lecture (Video) Series. Each section should be completed while watching the lecture video on the same section. Once completed, you will have a set of notes to accompany the Lecture (Video) Series section by section.
- *Student Organizer.* This organizer helps you study effectively through note-taking hints, practice, and homework while referencing examples in the text and examples in the Lecture Series.

Objective E Getting Help

If you have trouble completing assignments or understanding the mathematics, get help as soon as you need it! This tip is presented as an objective on its own because it is so important. In mathematics, usually the material presented in one section builds on your understanding of the previous section. This means that if you don't understand the concepts covered during a class period, there is a good chance that you will not understand the concepts covered during the next class period. If this happens to you, get help as soon as you can.

Where can you get help? Many suggestions have been made in this section on where to get help, and now it is up to you to get it. Try your instructor, a tutoring center, or a math lab, or you may want to form a study group with fellow classmates. If you do decide to see your instructor or go to a tutoring center, make sure that you have a neat notebook and are ready with your questions.

Objective F Preparing for and Taking an Exam

Make sure that you allow yourself plenty of time to prepare for a test. If you think that you are a little “math anxious,” it may be that you are not preparing for a test in a way that will ensure success. The way that you prepare for a test in mathematics is important. To prepare for a test:

1. Review your previous homework assignments.
2. Review any notes from class and section-level quizzes you have taken. (If this is a final exam, also review chapter tests you have taken.)
3. Review concepts and definitions by reading the Chapter Highlights at the end of each chapter.
4. Practice working out exercises by completing the Chapter Review found at the end of each chapter. (If this is a final exam, go through a Cumulative Review. There is one found at the end of each chapter except Chapter 1. Choose the review found at the end of the latest chapter that you have covered in your course.) *Don't stop here!*

Helpful Hint

MyMathLab[®]
and MathXL[®]

- Use the **Help Me Solve This** button to get step-by-step help for the exercise you are working. You will need to work an additional exercise of the same type before you can get credit for having worked it correctly.
- Use the **Video** button to view a video clip of the author working a similar exercise.

Helpful Hint

MyMathLab[®]
and MathXL[®]

Review your written work for previous assignments. Then, go back and re-work previous assignments. Open a previous assignment, and click **Similar Exercise** to generate new exercises. Re-work the exercises until you fully understand them and can work them without help features.

5. It is important that you place yourself in conditions similar to test conditions to find out how you will perform. In other words, as soon as you feel that you know the material, get a few blank sheets of paper and take a sample test. There is a Chapter Test available at the end of each chapter, or you can work selected problems from the Chapter Review. Your instructor may also provide you with a review sheet. During this sample test, do not use your notes or your textbook. Then check your sample test. If your sample test is the Chapter Test in the text, don't forget that the video solutions are in MyMathLab, the Interactive Lecture Series, and YouTube. If you are not satisfied with the results, study the areas that you are weak in and try again.
6. On the day of the test, allow yourself plenty of time to arrive at where you will be taking your exam.

When taking your test:

1. Read the directions on the test carefully.
2. Read each problem carefully as you take the test. Make sure that you answer the question asked.
3. Watch your time and pace yourself so that you can attempt each problem on your test.
4. If you have time, check your work and answers.
5. Do not turn your test in early. If you have extra time, spend it double-checking your work.

Objective G Managing Your Time

As a college student, you know the demands that classes, homework, work, and family place on your time. Some days you probably wonder how you'll ever get everything done. One key to managing your time is developing a schedule. Here are some hints for making a schedule:

1. Make a list of all of your weekly commitments for the term. Include classes, work, regular meetings, extracurricular activities, etc. You may also find it helpful to list such things as laundry, regular workouts, grocery shopping, etc.
2. Next, estimate the time needed for each item on the list. Also make a note of how often you will need to do each item. Don't forget to include time estimates for the reading, studying, and homework you do outside of your classes. You may want to ask your instructor for help estimating the time needed.
3. In the exercise set that follows, you are asked to block out a typical week on the schedule grid given. Start with items with fixed time slots like classes and work.
4. Next, include the items on your list with flexible time slots. Think carefully about how best to schedule items such as study time.
5. Don't fill up every time slot on the schedule. Remember that you need to allow time for eating, sleeping, and relaxing! You should also allow a little extra time in case some items take longer than planned.
6. If you find that your weekly schedule is too full for you to handle, you may need to make some changes in your workload, classload, or other areas of your life. You may want to talk to your advisor, manager or supervisor at work, or someone in your college's academic counseling center for help with such decisions.

1.1 Exercise Set MyMathLab® 

1. What is your instructor's name?
2. What are your instructor's office location and office hours?
3. What is the best way to contact your instructor?
4. Do you have the name and contact information of at least one other student in class?
5. Will your instructor allow you to use a calculator in this class?
6. Why is it important that you write step-by-step solutions to homework exercises and keep a hard copy of all work submitted online?
7. Is there a tutoring service available on campus? If so, what are its hours? What services are available?
8. Have you attempted this course before? If so, write down ways that you might improve your chances of success during this attempt.
9. List some steps that you can take if you begin having trouble understanding the material or completing an assignment. If you are completing your homework in MyMathLab® and MathXL®, list the resources you can use for help.
10. How many hours of studying does your instructor advise for each hour of instruction?
11. What does the  icon in this text mean?
12. What does the  icon in this text mean?
13. What does the  icon in this text mean?
14. Search the minor columns in your text. What are Practice exercises?
15. When might be the best time to work a Practice exercise?
16. Where are the answers to Practice exercises?
17. What answers are contained in this text and where are they?
18. What are Study Skill Tips of the Day and where are they?
19. What and where are Integrated Reviews?
20. How many times is it suggested that you work through the homework exercises in MathXL® before the submission deadline?
21. How far in advance of the assigned due date is it suggested that homework be submitted online? Why?
22. Chapter Highlights are found at the end of each chapter. Find the Chapter 1 Highlights and explain how you might use it and how it might be helpful.
23. Chapter Reviews are found at the end of each chapter. Find the Chapter 1 Review and explain how you might use it and how it might be helpful.
24. Chapter Tests are found at the end of each chapter. Find the Chapter 1 Test and explain how you might use it and how it might be helpful when preparing for an exam on Chapter 1. Include how the Chapter Test Prep Videos may help. If you are working in MyMathLab® and MathXL®, how can you use previous homework assignments to study?
25. What is the Video Organizer? Explain the contents and how it might be used.
26. What is the Student Organizer? Explain the contents and how it might be used.
27. Read or reread objective **G** and fill out the schedule grid on the next page.

1.2 Place Value, Names for Numbers, and Reading Tables

Objectives

- A** Find the Place Value of a Digit in a Whole Number. 
- B** Write a Whole Number in Words and in Standard Form. 
- C** Write a Whole Number in Expanded Form. 
- D** Read Tables. 

The **digits** 0, 1, 2, 3, 4, 5, 6, 7, 8, and 9 can be used to write numbers. For example, the **whole numbers** are

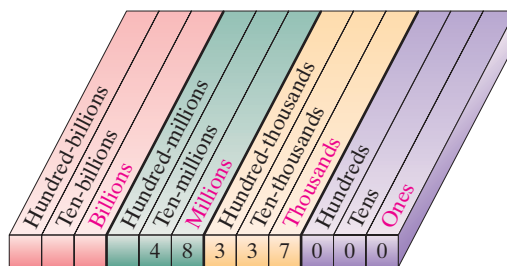

0, 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, . . .

and the **natural numbers** are 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, . . .

The three dots (. . .) after each 11 means that these lists continue indefinitely. That is, there is no largest whole number. The smallest whole number is 0. Also, there is no largest natural number. The smallest natural number is 1.

Objective **A** Finding the Place Value of a Digit in a Whole Number

The position of each digit in a number determines its **place value**. For example, the distance (in miles) between the planet Mercury and the planet Earth can be represented by the whole number 48,337,000. Next is a place-value chart for this whole number.

The two 3s in 48,337,000 represent different amounts because of their different placements. The place value of the 3 on the left is hundred-thousands. The place value of the 3 on the right is ten-thousands.

Examples

Find the place value of the digit 3 in each whole number.

1. 396,418

↑
hundred-thousands

2. 93,192

↑
thousands

3. 534,275,866

↑
ten-millions

Work Practice 1–3

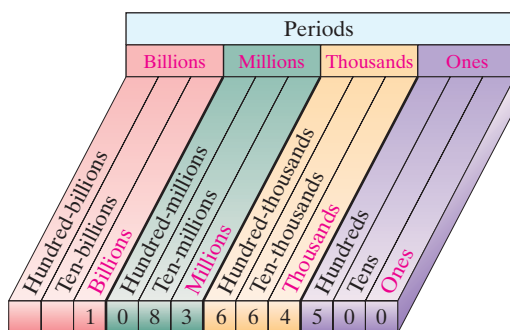

Practice 1–3

Find the place value of the digit 8 in each whole number.

1. 38,760,005
2. 67,890
3. 481,922

Objective B Writing a Whole Number in Words and in Standard Form

A whole number such as 1,083,664,500 is written in **standard form**. Notice that commas separate the digits into groups of three, starting from the right. Each group of three digits is called a **period**. The names of the first four periods are shown in red.

Writing a Whole Number in Words

To write a whole number in words, write the number in each period followed by the name of the period. (The ones period is usually not written.) This same procedure can be used to read a whole number.

For example, we write 1,083,664,500 as

one billion,
eighty-three million,
six hundred sixty-four thousand,
five hundred

Helpful Hint Notice the commas after the name of each period.

Answers

1. millions
2. hundreds
3. ten-thousands
